CHICK EMBRYOLOGY MATERIALS

Your class will need:

- Incubator
  (May be purchased at the store or constructed in the classroom)
- Fertile chicken eggs
  (Your school will receive information and order forms from Sedgwick County Extension 4-H in early February. Fertile egg pick-up day is usually scheduled for late March or early April.)
- Chick Embryology video (Available for purchase or loan from Sedgwick County Extension 4-H)
- "Charlie the Chick" handouts
  (One per student)
- Chick Incubation Calendar (One per class)
- Brooder box (Large cardboard, wood or metal box with heater or lamp)
- Water Container with marbles or medium-sized pebbles
- Chick starter food and chick feeder container

Activity Kit Contains:

___ 1 Styrofoam Incubator (reusable)

Clean and disinfect all reusable equipment with 1:5 bleach and water solution before replacing in activity box

**** Teacher will purchase fertile eggs

___ 1 Chick Embryology video (reusable)

**** "Charlie the Chick" may be ordered with fertile eggs

**** Incubation calendar will be received with fertile eggs

**** Teacher provides brooder box and heat source (A desk or clip-on lamp with 60 watt bulb)

___ 1 Water Container (reusable)

___ 1 Food Container (reusable)

**** Teacher provides chick starter food

Please check to make sure that ALL reusable supplies are returned CLEAN and UNDAMAGED. As you carefully place the all of the reusable supplies and the leftover consumable supplies into the activity supply kit, please mark them off on the checklist.

Please check twice! Because of the school 4-H club's limited budget, we are unable to replace missing or damaged equipment!
