1918

## ANNOUNCEMENT

On September 1, 1918, Mr. F. W. Bell succeeded Dr. C. W. McCampbell as secretary of the Kansas State Live Stock Registry Board and associate professor of animal husbandry in the Kansas State Agricultural College.

Mr. Bell has a keen insight into the problems of production, and feels that the man who stands a good purebred stallion is a public benefactor. He will use his best efforts to encourage a greater appreciation and use of good purebred sires by the mare owners of Kansas.

Mr. Bell is a man of wide experience and splendid training. He is recognized by state fair managers as one of the best judges of draft horses in the country. The stallion owners of Kansas are fortunate in having associated with them a man of such splendid ability who will always be available to help them in advancing the horse raising industry in this State.

**LETTER OF TRANSMITTAL**

To His Excellency, Arthur Capper, Governor of Kansas.

Sir: I have the honor to transmit herewith the Annual Report of the State Live Stock Registry Board for the year ending December 31, 1918.

C. W. McCAMPBELL, Secretary.

December 31, 1918.

## A SPECIAL REQUEST

The State Live Stock Registry Board requests stallion owners to use the utmost care in making application for stallion licenses, being certain:

- (1) That the application blank is accurately filled out in every detail.
- (2) That the application has been sworn to.
- (3) That the registry certificate (pedigree) accompanies the application for license if the stallion has changed ownership since the previous license was issued.
- (4) That the fees are in the form of post-office money order, express money order, draft, or certified check.
- (5) That all fees, papers, and pedigrees are inclosed in one envelope, as great confusion and delay are often caused when they are sent in different wrappers, due to the fact that 1,000 applications are sometimes received in one week, and care of this sort on the part of each stallion owner will assist greatly in the early issuance of licenses.
- (6) That the application for a license is sent just as soon as the application blank is received, thus avoiding delay in issuing the license and allowing one to advertise his stallion before the breeding season opens.
- (7) That all sections of the stallion license law are read carefully. The law has been in effect long enough so that everyone is expected to be familiar with its provisions and all must comply with each provision of the law. Attention to these details will assist not only the registry board, but the stallion owner as well.

**PROSECUTIONS**

The stallion license law provides a penalty in the form of a fine of from \$20 to \$50 and costs for standing or offering a stallion for public service without a license, and the courts have ruled that an **owner is standing a stallion for public service whenever he allows his stallion to serve mares owned by neighbors or others**, and a license is required.

A few stallion owners who have interpreted the law to suit their own fancy and have used their stallions without licenses have suffered the embarrassment and expense of an arrest, prosecution, and fine. However, it has always been the policy of the State Live Stock Registry Board to give stallion owners every possible opportunity to take out licenses before starting a prosecution, but when a stallion owner willfully and knowingly uses his stallion for public service without a license, the Registry Board is ready to prosecute if its attention is directed to such violation of the law. All information furnished the State Live Stock Registry Board relative to violation of this law will be treated confidentially.

**IMPROVEMENT IN PUBLIC SERVICE STALLIONS  
 SINCE 1910**

The work of the Kansas State Live Stock Registry Board continues to be rewarded by an increase in the percentage of purebred stallions standing for public service in the State. The table following shows the changes that have taken place since 1910, when the stallion license law went into effect:

BREED	American Saddle	Belgian	Cleveland Bay	Clydesdale	French Coach	French Draft	German Coach	Hackney	Morgan	Percheron	Shetland	Shire	Standardbred	Suffolk	Thoroughbred	Purebred	Grades and Scrubs	Total
1910.....	16	133	15	41	35	261	88	12	17	1342	9	114	553	1	12	2599	3766	6365
1918.....	27	194	2	42	11	298	27	7	24	2345	10	73	197	2	10	3269	1818	5087
Decrease or Increase	+11	+61	-13	+1	-24	+37	-11	-5	+7	+1003	+1	-41	-356	+1	-2	+670	-1948	-1278

A careful study of the table reveals some very interesting facts. Eight years ago 2,599 purebreds and 3,766 grades and scrubs were licensed

to stand for public service in Kansas. Only 40.8 per cent were purebreds while 59.2 per cent were grades and scrubs. During 1918 licenses have been issued for 3,269 purebreds and 1,818 grades and scrubs; 64.2 per cent purebreds and only 35.8 per cent grades and scrubs. In other words, 25 per cent more purebreds were licensed in 1918 than in 1910 and 49 per cent fewer grades and scrubs.

Furthermore, 2,954 purebred draft stallions and 315 purebred light stallions were licensed in 1918 as compared with 1,892 purebred draft stallions and 707 purebred light stallions in 1910. During this period there has been an increase of 56.1 per cent in the number of purebred draft stallions and a decrease of 55.6 per cent in the number of purebred light stallions. During this same period the number of purebred Percheron stallions has increased 74.7 per cent, and they represent 79.3 per cent of all the purebred-draft stallions standing for public service in Kansas during the year 1918.

Stallions of the different breeds, ranked in the order of the number licensed for 1918, appear in the following table:

Percheron .....	2,345
French Draft .....	298
Standardbred .....	197
Belgian .....	194
Shire .....	73
Clydesdale .....	42
American Saddlebred .....	27
German Coach .....	27
Morgan .....	24
French Coach .....	11
Shetland .....	10
Thoroughbred .....	10
Hackney .....	7
Cleveland Bay .....	2
Suffolk .....	2

The counties having fifty or more stallions in which the largest per cent of purebreds were licensed to stand for public service during 1918, also the percentages of purebredstallions licensed to stand for public service in these same counties in 1910, rank as follows:

County	Per Cent Purebred Stallions in 1918	Per Cent Purebred Stallions in 1910
1. McPherson .....	90	47.1
2. Mitchell .....	84.6	50.9
3. Clay .....	82.4	33.8
4. Rice .....	77.6	56.3
5. Decatur .....	75.9	27.1
6. Anderson .....	75.5	53.6
7. Dickinson .....	75	47.6
8. Sherman .....	75	38.8
9. Butler .....	74.7	57.5
10. Osborne .....	74	33.8

Clay county has shown the greatest improvement with an increase of from 24 to 47 in the number of purebreds and a decrease of from 47 to 10 in the number of grades and scrubs licensed to stand for public service. Decatur is a close second. Its purebreds have increased from 19 to 41 and its grades and scrubs have decreased from 51 to 13.

In 1910 more grades and scrubs than purebreds were licensed to stand for public service in 87 of the 105 counties of the State. The records for 1918 show that more grades and scrubs than purebreds were licensed to stand for public service in only twelve counties. The counties in which

more grades and scrubs have been licensed to stand for public service in 1918 are: Chautauqua, Cherokee, Hamilton, Linn, Logan, Lyon, Marshall, Pottawatomie, Seward, Sheridan, Stevens, and Wilson.

The stallion license law has given mare owners a means of knowing the exact breeding of the stallions they patronize, and has eliminated the misrepresentations regarding bloodlines which formerly appeared in many stallion advertisements. In 1909, over 2,000 grades and scrubs were advertised as purebreds, while in 1918, not one such animal was so advertised in Kansas newspapers. Previous to the passage of the stallion license law hundreds of grades and scrubs with fake and fraudulent pedigrees were sold as purebreds to unsuspecting purchasers at prices ranging from \$500 to \$4,200 each. These unscrupulous stallion peddlers have left the State, as the stallion license law has exposed their wares.

These practical and beneficial results from the operation of the stallion license law make it of inestimable value to the horse raisers of Kansas. The co-operation of every one interested in horses in seeing that the law has its widest application will result in even greater benefits.

---

## KANSAS HORSE BREEDERS' ASSOCIATION ANNUAL MEETING

January 25, 1918

**C. W. McCAMPBELL, Secretary**

The Kansas Horse Breeders' Association held its annual meeting at the Kansas Agricultural College on Friday, January 25, 1918. This meeting was the best attended in the history of the association. The program opened with an address by President Ross. He emphasized the fact that good farming would require good horses, and that good, sound purebred seed stock was necessary to produce good horses. He also urged the breeders of purebreds to use better sires, feed more liberally, and avail themselves of every possible opportunity to get their horses before the public.

C. W. McCampbell, secretary of the association, discussed the subject, "A New Attitude." Emphasis was placed upon the fact that a decided change has taken place upon the part of the average Kansas horse raiser regarding the kind of a sire he patronizes. Mare owners are demanding more and more that the sires they patronize shall be good, sound purebreds. Concrete evidence was presented that during the past eight years the number of grade and scrub sires standing for public service has decreased 1,266, while the number of purebreds has increased almost 1,600 during the same period.

H. L. Salmon of Fowler, Kan., was unable to be present to discuss the subject, "What a Small Breeder Can Do," but sent a letter summarizing in a splendid manner the results of his attempt to raise purebred horses. The letter read as follows:

As a beginner I do not think my experience or the little I know about the horse business will be of interest to the well seasoned breeders that will attend the Kansas Horse Breeders' Association meeting.

I had been raising grade drafters and made some money and thought I might raise some full bloods, so I bought Percherons of good types and bloodlines so the colts would grow out true to type. My herd horse, Perfection, was three years old when I bought him. I saw his mother and his colts—they were good. He had won the championship of Indiana. The three show mares I bought of Mr. Robison were four, five and seven years old, and probably need no introduction in Kansas, Oklahoma, and

Texas. They cost me \$1,955. Allow me to say that I believe a beginner should be willing to pay a fair price for good, sound breeding stock rather than buy the cheap, undersized, unsound stock that would not classify in a commercial horse market. Life is too short for a man to accomplish much with such stock.

I bought the mares three years ago, They have raised eight colts. I have sold four for \$2,100, and have four left that are looking well.

Yours for better horses,

(Signed) H. L. SALMON.

Dr. J. H. Burt of the Veterinary Department of the College substituted for Doctor Dykstra and gave an interesting talk on "Corn Stalk Poisoning."

The talk by Mr. Wayne Dinsmore, secretary of the Percheron Society of America, was an instructive review of the present situation in the horse world. The main part of this address appears in another part of this report.

The Kansas Breeders' Percheron Sale was held during the afternoon. The offering was a good one, but war conditions had a decided effect upon the prices obtained, particularly for stallions. The entire lot, including weanlings and yearlings, averaged \$375.

A business session was held in the evening at which the following officers were elected:

President, Geo. B. Ross, Kansas City, Kan.

Vice-president, 1st Congressional District, D. F. McAlister, Topeka, Kan.

Vice-president, 2nd Congressional District, C. R. Soward, Baldwin, Kan.

Vice-president, 3rd Congressional District, G. W. Forbes, Cherryvale, Kan.

Vice-president, 4th Congressional District, Wm. Branson, Overbrook, Kan.

Vice-president, 6th Congressional District, Ed. Nichelson, Leonardville, Kan.

Vice-president, 6th Congressional District, J. M. Rodgers, Beloit, Kan.

Vice-president, 7th Congressional District, H. L. Salmon, Fowler, Kan.

Vice-president, 8th Congressional District, J. C. Robison, Towanda, Kan.

Secretary-Treasurer, C. W. McCampbell, Manhattan, Kan.

Third member executive board, W. H. Rhodes, Manhattan, Kan.

The next annual meeting will be held at Manhattan, Kan., Friday, February 7, 1919. This is the week of the State Farmers' Institute, and will give our horse breeders an opportunity to attend several other interesting meetings.

## WHY BREED DRAFT HORSES

(Address by Wayne Dinsmore, secretary of the Percheron Society of America, before the Kansas Horse Breeders' Association, Manhattan, Kan., January 25, 1918.)

The draft horse breeders of the United States have before them the greatest opportunity ever presented to the horsemen of any nation. The world is their market, the demand enormous, and the supply limited. Prices are at a profitable point and will unquestionably go higher. From the standpoint of both patriotism and profit the horseowners of America should exert every effort to increase our production of draft horses to the utmost.

The foregoing statements are bold and comprehensive. Men who are fearful of the future for draft horses, ask proof. That proof is presented in the following pages. It is based upon thorough investigation and analysis of a world-wide situation.

The demand for draft horses is greater today than in any past period. War, city and farm needs, and export requirements furnish the market.

Conclusive proof of the need for horses in war is evidenced by the fact that the allied nations have bought and transported a little over 2,000,000 horses and mules to Europe during the forty months ending December 1, 1917. The British Lord of the Admiralty, addressing Parliament in December, 1917, stated that the transportation of this number of animals to Europe, with very few losses, was one of the achievements of the British navy. Approximately 1,350,000 of these were bought in and exported from the United States, as is shown by monthly reports of the Bureau of Foreign Commerce. The other 700,000 were bought elsewhere, mainly in Canada, South America, Australia, and New Zealand. The majority of the 2,000,000 head taken in this time by the allied nations were artillery and transport animals, carrying a predominant strain of draft blood.

Bitter experience has convinced army officers that horses and mules are indispensable on the battlefield. One horse to every four men in service, excluding cavalry, has been found to be needful; and the United States authorities, guided by the experience of veterans who have borne the burden of the fighting for three long years, have accepted this standard to make effective the work of fighting men. Ammunition wagons, mired down in battlefields behind advancing troops, have more than once required eighteen powerful transport horses to pull them through to where gunners, working with feverish energy, had swung cannon into position to meet German counter attacks; and in the winter months it has often been impossible to move high explosive shells forward to the guns except on pack animals. A British officer, relating his experience in transporting such ammunition in on pack horses and mules remarked: "It was the only way we could get it in. Each animal carried four shells, two on each side, swung in a pack saddle. When, as sometimes happened, a German high explosive shell hit an animal already loaded down with four of them, a whole string of pack animals was apt to go West."

Hard-pressed though the Allies have been for food and supplies—and with boat space urgently needed—horses have never ceased moving. The demand for the horse of draft breeding, in warfare, is amply proved by the foregoing indisputable facts. That demand will continue while war lasts.

The city demand for draft horses has been the safety valve for the industry. It has provided an outlet for geldings, which are less profit-

able than mares in farm use. That demand still exists. Prices ranging from \$250 to \$325 are being paid in the country by buyers for big city users. It is unwise to put a draft horse into city service before he is five years of age; but the demand so far exceeds the supply that buyers have been compelled to take three- and four-year-old horses in order to fill their actual needs. There is ample evidence that good draft geldings will always be needed in city traffic.

The demand for draft horses on our farms is increasing at a phenomenal rate. Argument to convince an intelligent farmer of the advantage of using heavy horses is no longer needed. He knows it. Farm sales reflect the situation. Roomy, drafty mares—grades—standing from 16 to 16.2 hands, and weighing \$1,600 pounds or over, will, if of reasonable age, command \$500 to \$600 per pair in almost any farm sale; and there are never enough of this sort to satisfy the clamorous demands of hard-headed farmers who want good teams. Small stuff and animals of draft breeding but too young to work may sell at a discount, but draft animals of serviceable ages are keenly sought after by farmers in all sections of this country. For a time last fall they sold below their real value, on account of the attempts of many owners to cut down on feed bills during the winter, in the hope that they might thereby be able to buy at a figure this spring which would make the venture profitable; but prices on good grade draft mares have advanced fully \$50 per head in the last sixty days, and men who sold themselves short last fall are destined to pay dearly for their experience this spring.

Foodstuffs are urgently needed. Our allies are living on a hand to mouth basis. The diversion of millions of men from peace to war has increased the consumption of foods, and has curtailed crop production. According to the Red Book, issued by Howard, Bartels & Co., authorities on grain statistics, the United States and those countries which are now its strongest allies produced in 1915, 2,216,801,000 bushels of wheat; in 1917 the same countries harvested but 1,471,128,000 bushels. Russia had 964,000,000 bushels of wheat in 1915, and but 736,000,000 bushels in 1917. Her production in 1918 is liable to be much less and is not available. The Argentine, Uruguay and Chili had in 1917, 231,500,000 bushels of wheat, as against 206,000,000 bushels in 1915. As a whole, however, the production of wheat by the allied nations and those countries to which they have ready access, was practically 700,000,000 bushels less in 1917 than in 1915. In the same countries, barley shows a decrease of about 37,000,000 bushels; rye a decrease of 19,000,000 bushels; and oats a decrease of 31,000,000 bushels. Corn alone shows an increase, and this is but 38,000,000 bushels. Figures issued by Food Administrator Hoover, in the Official Bulletin, for meat animals throughout the world, show a decrease of 8,420,000 cattle, 17,500,000 sheep, and 7,100,000 hogs, in the countries of our Western allies, which is not counterbalanced by the increase in cattle, sheep or hogs in the United States. The world's supply, considered as a whole, shows a decrease of 28,000,000 cattle, 54,000,000 sheep, and 32,000,000 hogs. No appreciable gain in live stock or grain production can be looked for while war lasts; and it will take years after peace comes to bring the world back to a point where there is an abundant surplus of food supplies. Famine has often left a broad trail of death in India and China. Unless a well planned, farsighted campaign is inaugurated and carried out there will be such shortage of foods among allied nations that old people will die twenty years before their time, little children perish by hundreds of thousands, and the vigor and vitality of whole nations be so undermined that twenty years will not suffice to undo the damage done.

The facts just cited are reasons for increasing heavy draft horses on farms. More land must be tilled than ever before, if a world that is now on the edge of famine is to be fed. Grains immediately available as food

for man must be increased in acreage; more wheat, barley, rye, and oats must be grown. More tillage is required of American farmers than ever before, and less labor is available wherewith to accomplish it. Increased efficiency per man employed on the farm is the only solution. John Buckler of Massachusetts reports that it is customary to plow there with a ten-inch walking plow and one team of 1,000-pound horses, plowing an average per day of one acre. Charles Nelson of Illinois says his neighbors use four or five horses, weighing over 1,600 pounds each, on a gang plow of two fourteen-inch bottoms and plow an average of from five to five and one-half acres per day. He has two such gang plows himself, but has also a three-bottom gang with which he uses six or seven draft horses and plows eight acres per day. A. P. Nave of Ohio formerly used a twelve-hole seed drill. He sold it and bought one of twenty holes, put on more horses, and now seeds twenty acres per day where he formerly could do but twelve. These are actual illustrations of increased work done per man on the farm. Larger implements covering more ground, with more horsepower, soon pay for themselves in increased work accomplished; and it is a matter of common knowledge that the farmer with heavy horses plows deeper, fits his land more perfectly, and harvests bigger crops than his neighbor who works with small horses, or not enough big ones.

We must produce more food, and do it with less labor. More and better draft horses furnish the key to the situation. Tractors will supplement but not displace draft horses, and their use cannot be recommended for the average farm. They may, for a time, frighten some men out of horse breeding, but their limitations are such that they cannot permanently injure our draft horse industry. Tractors cannot displace good draft mares on any well-managed farm.

The export demand for draft horses is certain to be very great at the conclusion of the war. All European nations have been nearly drained of horses of draft character. Prices on ordinary draft geldings are from \$500 to \$800 in Great Britain and France. In Holland prices from \$800 to \$1,200 have been realized for similar geldings, and yearling colts have brought \$400. It is needless to say that Germany is the purchaser. Far-sighted dealers in both France and Great Britain are already negotiating with American horsemen for heavy exports of draft horses, to begin as soon as the war closes and cargo space is available. The men involved are thoroughly responsible, and there is no question but that the export demand for big horses will be heavy for many years after the war closes. Leading British land-owners are doing all it is possible to do to increase horse breeding in Great Britain. In this connection it is interesting to note that extensive importations of Percherons have been made into Britain, and a British Percheron Society organized. The movement is backed by leading men who are convinced of Percheron superiority by the remarkable endurance which horses of Percheron blood have shown in this war.

The foregoing review proves that the demand for drafters, present and future, is broad and stable. We have next to consider the supply. Attention has already been called to the shortage of such horses in Europe. South America has but few that are large enough. Australia and New Zealand have some very good drafters, but there is certain to be a tremendous increase in all industries there following the war, due to the immigration of soldiers, and there is no likelihood that the countries in question will have any surplus to spare. Canada will be in the same situation. The need for draft horses is now so well recognized in the Dominion that most aggressive steps are being taken to increase and foster the breeding of drafters. Africa and Asia have no draft horses, and Russia has but few of this character. An agricultural expert who was located in Russia from 1910 until July, 1917, who is thoroughly reliable and especially well-informed on Russian conditions, recently told the writer that the vast majority of Russian horses were but ponies, under 1,000 pounds. He

added that but few horses, even in the best agricultural districts in European Russia, would stand 15.3 or weigh 1,300 pounds; and that virtually the only horses of real draft character were purebred Percheron horses, taken in prior to the outbreak of war. He was positive that Russia could make no contribution to the supply of draft horses for a great many years to come.

We have ascertained, therefore, by elimination, that but few draft horses are available in countries other than the United States.

We have somewhat over 21,000,000 horses on the farms and ranches of this country, according to the estimates of the Department of Agriculture for January 1, 1918. In the judgment of the most experienced and best-informed horsemen in the United States, less than 1,000,000 are horses that will mature at 1,600 or better—in other words, mature as draft horses. This excludes purebred draft horses which will not exceed 176,000 head, all breeds combined. Of the 20,000,000 remaining, it is impossible to form any accurate estimate regarding the number that stand over 15.1 and weigh over 1,200 pounds.

We are safe in saying, however, that the colts coming one and two years old this spring (1918) will not exceed 3,000,000 head. This leaves 17,000,000 horses, or approximately 8,000,000 mares, coming three years old or older, available for breeding this spring.

If 4,000,000 of the best and largest of these were bred to good draft stallions this spring, it would give us a tremendous increase in draft stocks, and in horses that would qualify as farm chunks or artillery horses, even if we raised but 2,000,000 colts out of 4,000,000 mares bred. Of the remaining 4,000,000 mares (after excluding cavalry, saddle and trotting mares of distinct type and real market value), all other small stock and mares with serious unsoundness, may well be bred to jacks, so that their faults may not be perpetuated to future generations. There is a good demand for mules, at high prices, so that this course has much to commend it. Generally speaking, the speedy removal of 4,000,000 or 5,000,000 small and inferior horses would be a godsend to the breeders of good horses; and draft horse breeders are not particular about the mode of exit taken by such undesirables.

The one factor which retarded horse breeding during the last two years is now practically eliminated. That was the surplus of army-type horses. The supply, which had been accumulating for years, is now fairly well cleaned up. Buyers report difficulty in obtaining good army horses in the country; and while horses of this type coming five years old this spring will probably take care of the demands for the coming season, there is no longer a burdensome surplus of such horses in farmers' hands. Prices are rising on good horses, and thousands of farmers, who find themselves short on work stock this spring, will feel more inclined than in the past to breed their mares.

Certain it is that every good mare weighing 1,200 pounds or over should be bred in this and succeeding seasons to the best available draft stallion. Every horseman should lend his influence to that end. Our state authorities, colleges of agriculture, experiment stations, and the department of agriculture should be urged to exert their powerful influence to encourage draft horse breeding. It is profitable. It is patriotic.

## PRESENT AND FUTURE NEED OF DRAFT HORSES

(C. W. McCampbell)

Seventy-five thousand sound Kansas horses—an average of 750 from each county—have been shipped across the sea, and many thousands must follow to help win this war. In numerous instances horses that could not well be spared have been sacrificed. This has materially lessened the horse power of the State.

High-class draft horses are bringing higher prices at farm sales than ever before. This is probably the best evidence of the present shortage of good work horses in this country.

Shortage of horses is more noticeable in Europe. Recently at Hereford, England, fifty-eight grade geldings and mares sold at public auction at prices ranging from \$500 to \$850 each. In the issue of the Hereford Times reporting this sale, there also appears the following notice: "The executive committee of the Herefordshire War Agricultural Committee has decided that no horses suitable for work on the land, under six years of age, may be sold to go out of the country."

Reconstruction processes after the war will add to the present demand, and the United States with its excellent natural advantages will be expected to furnish the horses needed. As only one out of every twenty of the horses of the State will classify as a draft horse and weigh 1,600 pounds or more, each Kansas farmer should breed every mare he owns showing a predominance of draft breeding, to a good, sound, purebred draft stallion. Such a policy will be profitable as well as patriotic.

---

## EFFECT OF THE WAR ON THE DEMAND FOR HORSES

(C. W. McCampbell)

The effect of the war on the demand for horses has been important, but not as far reaching as many have been led to believe. Since the beginning of the war approximately 1,000,000 horses, an average of 500,000 annually, have been exported from the United States. This is a large number when considered in the aggregate, but when compared with our total horse population it has not been so large, being only 2½ per cent of the whole, or one out of every forty horses.

In general, the kind of horses that are being taken for war purposes are: French cavalry—mare or gelding 5 to 9 years old, weighing from 900 to 1,150 pounds; price paid at point of inspection, \$90 to \$115. French light artillery—mare or gelding 5 to 9 years old, 1,080 to 1,275 pounds; price, \$125. French heavy artillery—mare or gelding, 1,280 to 1,500 pounds; price, \$140. British cavalry—mare or gelding 5 to 10 years old, 1,050 to 1,150 pounds; price, \$130 to \$150. British light artillery—mare or gelding 5 to 10 years old, 1,250 to 1,450 pounds; price, \$140 to \$175. British heavy artillery—mare or gelding 5 to 10 years old, 1,500 pounds or over; price, \$175 to \$200.

The British demand a neater, smoother, better made, better gaited, and sounder horse than the French and have been willing to pay more for their horses. Most of the horses taken have weighed less than 1,400 pounds, a type for which there is very little commercial demand here.

Market men express the opinion that this class of horses would be selling for \$50 per head less were it not for the war demand.

The United States government has not made heavy purchases to date and our latest information from the quartermaster general's office states that only horses from 6 to 10 years old weighing from 950 to 1,350 pounds are being purchased.

There has been practically no war demand for the heavy draft horse weighing from 1,700 to 1,900 pounds, yet this class of horses is selling higher today than ever before. These facts and figures are significant and show us that the demand for the war horse is an unstable one and that this kind of a horse is not a profitable one for the farmer to raise so long as the country remains overstocked with this type of horse, as it is today, and so long as the heavy draft horse continues to be the most efficient and profitable farm horse.

---

## **THE EFFECT OF THE WAR ON THE IMPORTATION OF BREEDING HORSES TO THE UNITED STATES**

**(C. W. McCampbell)**

The war has almost entirely stopped the importation of purebred horses into the United States. In 1913, 5,713 horses were shipped into the United States for breeding purposes. Most of these horses were Percherons. Only a few Percherons have been imported during the year 1918, and late information shows a decrease of 25 per cent in the horse stock of France.

In the past, most of the horses that have been imported for breeding purposes came from France. It is quite evident that the war has made impossible the extensive importation of Percherons for many years. This very condition has been a real blessing to the horse industry of this country. So long as the French supply was available we allowed ourselves to depend upon that source, but since that supply is no longer available, breeders and dealers have discovered that just as good Percherons can be grown in this country as can be grown in France, if we will but feed as well and as liberally as the French do. Hence the most valuable effect that the war has had on the importation of horses into the United States is that it has forced us to appreciate more fully the value of the American-bred purebred for breeding purposes.

---

## **SOME TRACTOR EXPERIENCES IN KANSAS**

**(C. W. McCampbell)**

Many Kansas farmers devote the greatest portion of their time, energy, and land to wheat growing. This has led the enthusiast and theorist to believe that such farmers should use only tractors for motive power. The superficial logic of their arguments has made Kansas the best market for farm tractors in the United States. In order to secure reliable information on the horse and tractor situation as a result of the experience of Kansas farmers, a questionnaire was mailed to 500 tractor users in the State.

Approximately 90 per cent of the tractor users had purchased them for the special purpose of plowing wheat ground. In fact, tractors have been used by these farmers for all purposes—plowing, grinding, etc.—

for an average period of only 36.6 days per year. The men using these tractors maintained only 8.4 head of cattle—including all kinds and all ages—for every 100 acres plowed, which indicates that they were typical grain farmers. Yet they were able to eliminate only .64 of a horse for each 100 acres plowed, and 66 per cent of them were unable to eliminate any horses as a form of motive power, although they each plowed annually an average of 317.22 acres.

A most interesting answer to the question concerning the number of horses that had been eliminated since purchasing a tractor read as follows: "Not one; it just makes the work easier." Evidently there are special occasions and places when the tractor is very convenient, but one can not always afford to invest in a machine for convenience only, especially if it can be used only for a limited period of time in well-adapted locations or fields. This suggests that the tractor in its present stage of development may well be regarded as a handy piece of additional farm machinery rather than as a complete substitute for horses as a form of motive power. The fact that the tractor owners replying used them only 36.6 days per year adds weight to the idea that the tractor is not, on the average, an economical substitute for horses. One purchaser gave as his main reason for buying a tractor: "I didn't know any better." Another desired "to do away with the heavy work on horses in the fall so I can raise more colts."

Very few users kept records of the cost of fuel, repairs, or labor involved in operating a tractor. A few of the comments of those who had kept such records follow:

From a farmer plowing 470 acres: "It is not practical for anything but plowing and grinding."

From a farmer plowing 800 acres: "I bought a tractor, but it did not give satisfaction, so I sold it this spring. I think my horses and mules give better service than a tractor."

From a farmer plowing 200 acres: "The tractor does not compare with horses and mules. There is nothing to them."

From another: "I disposed of my tractor. I do not think they are the thing for a small farmer."

From still another: "I will now admit that a person cannot farm without horses."

If wheat farmers have been unable to eliminate only .64 of a horse for each 100 acres plowed, is it not reasonable to expect that a much smaller number of horses can be eliminated from diversified farms? Furthermore, is not diversified farming the most practical and profitable? Apparently the place and use of the tractor on the farm has not been well understood, and its efficiency and adaptability have been greatly overrated. The experiences of the men from whom the above data were secured suggest that the prospective tractor purchaser study very carefully the motive power needs of his own particular farm, also the efficiency, adaptability, depreciation, and cost of operating and maintaining a tractor before making his purchase. One may occasionally find that he needs a tractor only, sometimes a tractor and horses, but more often he will find that efficiency, economy, good farming, and profit will demand horses only.

**CHAPTER 318**  
**RELATING TO THE REGISTRATION AND LICENSING**  
**OF STALLIONS**

**Senate Bill No. 277**

An Act regulating the registration, advertising, and licensing of stallions for public service in the State of Kansas, and repealing chapter 168 of the Session Laws of 1909 and all laws and parts of laws in conflict herewith.

**Be it enacted by the Legislature of the State of Kansas:**

Section 1. Every person, persons, firm, corporation, company or association that shall stand, travel, advertise or offer for public service in any manner any stallion in the State of Kansas, shall secure a license certificate for such stallion from the Kansas State Live Stock Registry Board, as hereinafter provided. Said board shall consist of the dean of the division of agriculture, head of the animal husbandry department, and head of the veterinary department of the Kansas State Agricultural College.

Sec. 2. To obtain a license certificate as herein provided, the owner of such stallion shall comply with the following requirements: first, the owner of a purebred stallion shall forward to the Kansas State Livestock Registry Board for inspection, the registry certificate or a certified copy of the registry certificate of such stallion, also other necessary papers or documents relating to the breeding and ownership of such stallion. Second, owners of cross-bred or grade stallions shall forward to the Kansas State Live Stock Registry Board affidavit showing the breeding of such stallion. Third, owners of scrub stallions shall forward to the Kansas State Live Stock Registry Board a statement of the breeding of such stallion. Fourth, the fee for such stallion license shall be \$2.00 and said fee shall accompany each application for license, provided, however, that in case the stallion was licensed previous to July 1, 1913, under provisions of Chapter 168, Laws of 1909, the fee for a new license shall be one dollar.

Sec. 3. The Kansas State Live Stock Registry Board shall have power to revoke, cancel, and recall any license when said board shall find that such license does not truly and correctly represent the horse for which said license was originally issued, and when a license is revoked by the said board, it shall be the duty of the sheriff or a constable of the county where such license is located, to take possession of said license and deliver the same to said Kansas State Live Stock Registry Board when called upon by said Kansas State Live Stock Registry Board to take possession of said license.

Sec. 4. The Kansas State Live Stock Registry Board shall issue four kinds of licenses as follows: purebred, for stallion correctly recorded in stud books recognized by the Kansas State Live Stock Registry Board; cross-bred, for stallion whose sire and dam are of different breeds but each is correctly recorded in the stud book maintained for that particular breed, provided said stud books are recognized by the Kansas State Live Stock Registry Board; grade, for stallion whose sire or dam is recorded in a stud book that is recognized by the Kansas State Live Stock Registry Board; scrub, for stallion whose sire or dam are neither recorded in a stud book recognized by the Kansas State Live Stock Registry Board.

Sec. 5. It shall be the duty of the Kansas State Live Stock Registry Board to examine and pass upon the merits of each registry certificate and statement of breeding submitted, as herein provided, and it shall use as its standard the stud books and signatures of the duly authorized offi-

cers of the various horse pedigree registry associations, societies, or companies certified by the U. S. Department of Agriculture, Washington, D. C., Bureau of Animal Industry, in Order No. 136, dated June 20, 1906, and any other stud books which may be established in the future when an association or company establishing such studbooks shall prove to the satisfaction of the Kansas State Live Stock Registry Board that they are doing an honest, reputable and creditable business, and that such stud books are necessary for the protection and encouragement of that particular breed.

Sec. 6. Each license issued by the Kansas State Live Stock Registry Board shall expire on December 31 of the year in which it is issued, but each license may be renewed each year, provided the owner of said stallion make application for renewal before March 1 following the date of expiration, and forward with such application for renewal a fee of one dollar for each renewal, and submit satisfactory evidence establishing the identity of stallions for which renewal of license is requested. Each renewal shall expire on December 31 of the year for which it is renewed. Failure to have license renewed, as herein provided, before March 1 following the date of expiration, shall forfeit the right of renewal and when such right has been forfeited, the owner of such stallion shall procure a new license as provided in section 2.

Sec. 7. The license certificate for a stallion correctly recorder in a stud book recognized by the Kansas State Live Stock Registry Board shall contain the following information: license number, registration number, breed, color, age, pedigree, name and address of owner, date of issue, the seal of the Kansas State Live Stock Registry Board, and the signature of the secretary of the Kansas State Live Stock Registry Board. The license for a cross-bred, grade, or scrub stallion shall contain the following information: license number, statement of breeding, color, age, name and address of owner, date of issue, seal of the Kansas State Live Stock Registry Board, and the signature of the secretary of the Kansas State Live Stock Registry Board.

Sec. 8. Each bill, poster, or other advertisement of every kind and nature, issued by the owner, keeper, or person in charge of any stallion enrolled and licensed under this act and used to advertise such stallion by said owner, keeper, or person in charge, shall have as a heading for such advertisement the class of license issued for said stallion and the number of his license; thus, "Purebred License No....." "Cross-bred License No....." "Grade License No....." or "Scrub License No....." as the case may be. In all advertisements this heading shall be set in the **largest and boldest** type used in the advertisement.

Sec. 9. The owner, keeper, or person in charge of any stallion standing for public service in this State shall post and keep affixed during the entire breeding season, the license certificate of each stallion issued under the provisions of this act, in a conspicuous place in each stable or building where said stallion stands for public service.

Sec. 10. Upon transfer of ownership of any stallion licensed under the provisions of this act the new owner shall forward to the office of the Kansas State Live Stock Registry Board the license issued in the name of the former owner, together with the fee of fifty cents and satisfactory evidence that the stallion transferred is the one for which the license was originally issued. It shall then be the duty of the Kansas State Live Stock Registry Board to record such transfer and issue a license in the name of the new owner.

Sec. 11. It shall be the duty of the county clerk of each county in the State of Kansas to file with the Kansas State Live Stock Registry Board before July 1 of each year, a complete list of all stallion owners in his county, together with the number of stallions owned by each, as shown by the assessor's report of that particular county. He shall also file with the

Kansas State Live Stock Registry Board before July 1 of each year, the total number of horses in his particular county.

Sec. 12. It shall be optional with owners, keepers, or persons in charge of stallions standing for public service whether or not said stallions shall be examined for soundness, but no stallion shall be advertised in any manner either directly or indirectly as a sound stallion until a certificate of soundness has been issued for said stallion by the Kansas State Live Stock Registry Board, and then said stallion may be advertised as sound only during the life of the certificate of soundness. This certificate of soundness shall be punished by a fine of not less than \$20 and not more than \$50 for during which it is issued. The fee of each certificate of soundness shall not exceed \$2.00 for each stallion.

Sec. 13. Any person, persons, firm, company, corporation or association that shall violate any of the provisions of this act, shall be deemed guilty of a misdemeanor and upon conviction in any court of competent jurisdiction shall be punished by a fine of not less than \$20 and not more than \$50 for each offense.

Sec. 14. The funds accruing from the above named fees shall be used by the Kansas State Live Stock Registry Board to defray the expenses of enrolment of pedigrees and the issuing of licenses, to publish reports or bulletins containing lists of stallions, licenses and transfers, and all money accruing above the amount necessary for said purposes shall be turned into the general revenue fund of the State. It shall be the duty of the Kansas State Live Stock Registry Board to make annual report, including financial statements, to the governor of the State, and all financial records of said Kansas State Live Stock Registry Board shall be open to inspection.

Sec. 15. All licenses issued by the Kansas State Live Stock Registry Board under the provisions of chapter 168, Laws of 1909, shall become null and void and not in force on and after July 1, 1917.

Sec. 16. All laws and parts of laws, including chapter 168, Laws of 1909, in conflict with this act are hereby repealed.

Sec. 17. This act shall take effect and be in force from and after July 1, 1913, and its publication in the official statute book.

Approved March 3, 1913.

STALLIONS LICENSED FROM JANUARY 1, 1918, TO DECEMBER 31, 1918
