

TOPIC: Moving From Diffuse Implementation to Targeted Implementation by State

1. Identify major issues
 2. What are the challenges/obstacles and opportunities? What is their nature? e.g. available technology, need for knowledge or information, attitudes towards environmental protection, economics, social factors.
 3. How can we improve our strategy and plan of action to address the issue?
 4. Suggest specific actions to be taken and the persons who will follow through on these.
